DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, line 13, "third" should be changed to --fifth-- because the left side strike panel (lines 6-7) does not define a "said third profile edge".

Similarly, in claim 1, "fourth" (line 14), "fifth" (line 16), "sixth" (line 18) and "seventh" (line 19) should be changed to --sixth--, --seventh--, --eighth--, and --third--, respectively.

Similarly, in claim 3, "third" (line 15), "fourth" (line 17), "fifth" (line 21), "sixth" (line 23) and "seventh" (line 24) should be changed to --fifth--, --sixth--, --seventh--, --eighth-- and --third--, respectively.

Claim Rejections - 35 USC §§ 102 and 103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 5,778,959 (Guetschow).

Figure 1 of Guetschow shows five pivotably-attached panels 1 that correspond to the recited ricochet, strike and center panels.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 5,054,507 (Sparks).

Figures 2 and 4 of Sparks show a plurality of coupled panels 11,12 that correspond to the recited panels. Screen 17 corresponds to the recited net portion and is considered movable

Art Unit: 3711

when the panels are moved with respect to each other. Further, the flexibility of screen 17 (see Figure 4) is considered to allow the panels to have at least two hundred seventy degrees of motion. It would have been obvious to one of ordinary skill in the art to provide wheels with the Sparks panels to allow a user to more easily transport the device from one location to another.

Allowable Subject Matter

7. Claim 3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
